

## Broadband Network Controller Certification Program (Level 1)

### Description

The Broadband Network Controller Certification (BNCC) designation demonstrates the ability to configure, provision, and provide broadcast, interactive, and secure services to Digital Home Communications Terminals using the Digital Broadband Delivery System (DBDS).

Level 1 Certification is earned by passing a 2-hour written exam. The exam is available online via the Internet. Potential candidates must pass the written exam and earn Level 1 Certification prior to scheduling the practical exam for Level 2 Certification.

To successfully pass the written examination, candidates must obtain a minimum score of 70%.

### Requirements

Prerequisites are not required for any candidate. However, SP Video Education highly recommends attendance in the *Activating and Operating Digital Subscriber Networks* and the *Advanced DBDS Troubleshooting* courses.

The certification requires knowledge and skills in the use of Sun Solaris UNIX, data network switching, and Informix database management.

### Candidates

Potential candidates for this certification include:

- Digital Subscriber Network Operators
- Transport Network Engineers
- Access & Distribution Network Engineers
- Software Control System Engineers

### Program Information

Part Number: 752365

Length: 2 hours maximum (per Level 1 Certification)

Location: Online – via Internet
